2016-2017 Summer Assignment

Class of 2017, welcome to AP Stats. By now you should have received an email from me welcoming you our class. While I'm not sure what period you have Stats yet, I am certain we will be off and running from the very first day of school. In fact, your work starts before the first day. By completing Chapter 1 as a summer assignment, we will have more time in the school year to review and reinforce concepts.

Assignment:

1. Check your school email. This will give you the information you need to sign up and log onto Coursesites (Blackboard). We will use this site for the course. There is only class in Coursesites and no matter what class you are assigned to in the fall we will all work in this one class.
2. Read Chapter 1 of your textbook: The Practice of Statistics (Starnes, Yates, Moore, 4th ed.)
3. Watch videos and complete Notetaking Guide (NTG) for Chapter 1
4. Complete Chapter 1 assignments. See the weekly syllabus in Chapter 1 for more information.
5. I will offer Summer Office Hours. Please see Coursesites announcements for those dates and times.

Resources/Supplies:

- You will need a **TI-84+ graphing calculator.** I strongly recommend any student going to attend a 4 year college to purchase one. If, however, you do not purchase one, I can check one out to you. Please have your parent/guardian sign the permission slip form. As soon as you return the permission slip to me I can check one out to you.

- I recommend a 2 ½-3 inch binder for this course. You will need it.

Academic Dishonesty- This is also found on the course syllabus:

Cheating of any kind will not be tolerated. All involved parties will earn zeros on the assignment or assessment and a disciplinary referral will be sent to the Deans Office. The following are examples of cheating; however, this list is not all inclusive:

- Representing the work of others as your own (copying homework, letting someone copy your work, etc.)
- Looking at another student's paper during a test or quiz.
- Using prohibited materials (notes, etc.) on tests.
- Sharing calculators during tests or quizzes.
- Discussing tests or quizzes with students in other sections of the class who have not yet taken them.
- Receiving or giving help of any kind for a take home test or quiz.
- Cell phones seen during test or quizzes will be considered cheating.
- Talking during a test/quiz
- Using and copying answers from the internet. DO NOT Copy answer from the internet, other students, or directly from the website. Doing so will result in an academic integrity violation, a referral to the deans, and a zero on the assignment/test/quiz/project.

Due Date and Grading of Summer Assignment: Summer assignments must be completed at the start of class on the first day of class, **September 6, 2016.** **I will not accept any summer assignments late** so please do not wait to start them.

If you have any questions or concerns, please email me at

trundy-alethea@montytech.net

Enjoy your summer and I look forward to seeing you in the fall!

Mrs. Trundy
